

FlapNest™ 2115 Series

ATTACHED LID NESTABLE CONTAINERS

The FlapNest™ 2115 is the Perfection of Nestable Containers

Attached-lid nestable containers have been used for shipping dry goods to retail for over 20 years. Today, the FlapNest™ 2115 offers a new generation of innovative features that bring even more savings and efficiencies to the supply chain. Our advanced computer-aided design technology eliminates problems commonly experienced with other tote manufacturers including high breakage rates, safety concerns, low recycle value (associated with wire hinges), and inferior security measures.

FLAPNEST™ 2115 SPECIFICATIONS
